Department of Information Resources (DIR)
Cybersecurity Program

Learning Tree provides the training and operational management services for DIR's InfoSec Academy. The Texas DIR InfoSec Academy provides security and education training support to state of Texas agencies and institutions of higher education. The cybersecurity certification training list below and exams are included in the program:

CCSP Certification - Certified Cloud Security Professional Training and Certification Exam Prep
Course 1213 • 5 Days

This (ISC)® Certified Cloud Security Professional (CCSP) certification training course provides a thorough understanding of the information security risks and mitigation strategies critical to data security in the cloud. This course covers the six domains of the Official (ISC)® CCSP Common Body of Knowledge (CBK®), and prepares you to pass the CCSP exam and become a Certified Cloud Security Professional.

CHFI Certification - Computer Hacking Forensic Investigator Exam Prep
Course 2023 • 5 Days

This EC-Council Computer Hacking Forensic Investigator (CHFI) certification course will prepare you to achieve this in-demand certification. Learn a detailed, methodological approach to computer forensic and evidence analysis, including searching and seizing, chain-of-custody, acquisition, preservation, analysis and reporting of digital evidence. This CHFI certification course provides the necessary skills to perform effective digital forensic investigations and covers the major tools and theories used by cyber forensic experts today.

ECSA Certification - EC-Council Certified Security Analyst Exam Prep
Course 2024 • 5 Days

The EC-Council Certified Security Analyst (ECSA) certification is a security credential like no other. This ECSA penetration testing course provides you with a real world, hands-on penetration testing experience while you prepare to take the ESCA exam. Elevate your ethical hacking skills by utilizing EC-Council's published penetration testing methodology.

ECIH Certification - EC-Council Certified Incident Handler Exam Prep
Course 2025 • 2 Days

The EC-Council Certified Incident Handler (ECIH) program is designed to provide the fundamental skills to handle and respond to computer security incidents in an information system while preparing you to pass the ECIH exam. The course provides incident response training by addressing various underlying principles and techniques for detecting and responding to current and emerging computer security threats. After attending the course, you will be able to create incident handling and response policies and deal with various types of computer security incidents.

CCISO Certification - EC-Council Certified CISO Exam Prep
Course 2026 • 5 Days

The Certified CISO (CCISO) EC-Council program is the first of its kind training and certification program aimed at producing top-level information security executives. The CCISO does not focus solely on technical knowledge but on the application of information security management principles from an executive management point of view. Each segment of the program has been developed with the aspiring CISO in mind and looks to transfer the knowledge of seasoned professionals to the next generation in the areas that are most critical in the development and maintenance of a successful information security program.

CEH Certification - Certified Ethical Hacker Exam Prep
Course 2031 • 5 Days

In this award-winning Certified Ethical Hacker (CEH v10) training, you are provided with the foundational knowledge needed to pass the EC-Council Certified Ethical Hacker exam (312-50). Through hands-on labs which mimic real time scenarios, gain an in-depth understanding of how to deploy the tools and techniques needed to protect your network.

LPT Certification - EC-Council Certified Advanced Penetration Tester Exam Prep
Course 2033 • 4 Days

There are good penetration testers and then there are great penetration testers — set yourself apart from the pack with EC-Council's Licensed Penetration Tester (Master) certification. This advanced penetration testing course prepares you for the LPT (Master) certification exam and covers the testing of modern infrastructures, operating systems and application environments. It also covers the process to document and prepare a professional penetration testing report. This course takes the Certified Ethical Hacker credential to the next level.

CISM Certification - Certified Information Security Manager Exam Prep
Course 2036 • 4 Days

Achieve CISM certification with this official ISACA course. Gain an in-depth knowledge of the four CISM domains: security governance; risk management and compliance; security program development and management; and security incident management.

CRISC Certification - Risk and Information Systems Control Exam Prep
Course 2037 • 4 Days

This official ISACA CRISC certification course provides you with in-depth coverage on the four CRISC domains: risk identification; IT risk assessment; risk response and mitigation; risk and control monitoring and reporting.

CISA Certification - Certified Information Systems Auditor Exam Prep
Course 2040 • 4 Days

An ISACA Certified Information Systems Auditor is recognized as one of the leading authorities in the areas of IS auditing, control, and information security. This official CISA training course provides you with in-depth coverage of the five CISA domains that are covered on the CISA exam. These domains include auditing information systems; IT governance and management of IT; information systems acquisition, development, and implementation; information systems operations, maintenance, and support; and protection of information assets.

LEARNING TREE INTERNATIONAL

CASP Certification - CompTIA Advanced Security Practitioner Certification Exam Prep
Course 2046 • 5 Days

This CompTIA Advanced Security Practitioner (CASP+) training course will prepare you to successfully achieve this in-demand certification and teach you to assess, investigate, examine, and research potential security threats in your organization

CISSP Certification - Certified Information Systems Security Professional Training and Certification Exam Prep
Course 2058 • 5 Days

Attend this official (ISC)2® CISSP certification course and get prepared to pass the exam and become a CISSP. You will gain the foundational knowledge to fully prepare for the exam, including a comprehensive understanding of the CISSP® CBK® 8 domains. Your course tuition includes the current Official (ISC)2® Guide to the CISSP® CBK®, and a voucher that allows you to take the exam at any Pearson VUE Test Center.

SSCP Certification - Systems Security Certified Practitioner Training and Certification Exam Prep
Course 2060 • 5 Days

Attend this official (ISC)2® SSCP certification course and get prepared to pass the exam and become a Systems Security Certified Practitioner. IT will provide you with in-depth coverage on the skills and concepts in the seven domains of systems security including Access Controls, Security Operations and Administration, Incident Response, Cryptography and Network Security among others.

CompTIA Security+ Certification Training
Course 446 • 5 Days

This CompTIA Security+ training course provides the foundational knowledge you need to pass the CompTIA Security+ SY0-501 certification exam, and the skills to ensure compliance and operational security in your organization. CompTIA Security+ certification is a vendor-neutral certification that is recognized worldwide as a benchmark for information system security best practices. Earning Security+ certification demonstrates your knowledge of industry-wide information assurance topics, like systems security, network infrastructure, access control, assessments and audits, cryptography, and organizational security.

System and Network Security Introduction
Course 468 • 5 Days

In this Network Security training course, you gain the knowledge and skills to analyze and assess network risks, then select and deploy appropriate countermeasures. Through multiple hands-on exercises you will learn to evaluate methods for strong authentication, search for possible vulnerabilities in operating systems, and reduce your organization's exposure to dangers in enterprise-wide and virtual private networks.
